

Fish Bone Meal

Fish Bone Meal is a high-organic mineral and protein supplement derived from the fresh cuttings of marine white fish species harvested and processed for human consumption. All processing is domestic and shore-based. All facilities are federally inspected. Commercial fisheries targeting Pacific whiting (*Merluccius productus*) and other groundfish species on the West Coast of the United States conform to [Marine Stewardship Council](#) standards and reflect our “Sustainability Mission” to promote socially and ecologically responsible marine resource management practices worldwide. Utilizing only fish cuttings from established marine fisheries managed as sustainable natural resources is the best way to ensure our product is wholesome, renewable and consistently available.

Fish Bone Meal is a unique feed ingredient. It contains a complete array of macro and micro minerals, and the protein component is highly digestible. No additives are utilized for processing or preservation.

Fish Bone Meal is a product of the United States of America. It is traceable with documentation showing source and processing of raw material utilized in production and final product formulation. Our company benefits from vertical integration within a human seafood company, [Pacific Seafood Group](#), through access to their electronic tracking of fish catch, landings and processing, and the subsequent disposition of fresh fish cuttings. Pacific Seafood Group maintains strict quality standards based on scientifically-derived FSMA/HACCP systems at all our locations to ensure that the product you receive is the highest quality.

Customers are always welcome to visit our facilities and review our practices. Our definition of excellence, “*consistently doing your best and always striving to do better*”, demonstrates our commitment to providing a traceable, sustainable and wholesome product to our customers and yours.

Microbial Analysis

Aerobic Plate Count	100,000 cfu / g
---------------------	-----------------

Product Characteristics

Color	Light brown
Odor	Mild fish
Physical	Free-flowing
Density	Approximately 30 - 35 lb / ft ³
pH	7.0 – 7.5
Storage	Store in a cool, dry place in original packaging
Stability	12 months when appropriately stored

Packaging	Bulk bags (1,500- 2,000 lb)
------------------	-----------------------------

AAFCO Ingredient Name Fish Bone Meal, Fish Meal

Processing Statements

Allergen: This product contains fish and is processed in a facility that processes crustacean shellfish.
This product is not intended for human consumption.

Typical Values

The values for amino acids, minerals, microbial analysis and product characteristics are typical and expected.

Manufacturer

Pacific Bio Products- Warrenton, LLC
(DBA BioOregon Protein, Inc.)
P.O. Box 429
1935 NW Warrenton Drive
