

BioGan® 6-8-0

100 % Natural Organic Fertilizer from Shrimp Shell

BioGan® 6-8-0 is a natural, organic fertilizer composed entirely of shrimp shells derived from fresh cuttings of wild Pacific pink shrimp (*Pandalus jordani*) harvested and processed for human consumption. All processing is domestic and shore-based. All facilities are federally inspected. Our fertilizer is registered for use in organic agriculture by the Washington State Department of Agriculture (WSDA) Organic Food Program. It contains no additives for processing or preservation.

BioGan® 6-8-0 is a concentrated source of water insoluble, slow-release nitrogen. In addition, it supplies a significant amount of phosphorus and calcium, and a complete array of major and secondary soil nutrients. Chitin content of this fertilizer is approximately 23.5 %. Our fertilizer is ideal for establishing fertile soils and growing healthy plants. It releases nutrients slowly and evenly as it decomposes through natural soil microbial activity.

BioGan® 6-8-0 is a product of the United States of America. It is traceable with documentation showing source and processing of raw material utilized in manufacturing. Our company benefits from vertical integration within a human seafood company, [Pacific Seafood Group](#), through access to their electronic tracking of catch, landings and processing, and the subsequent disposition of fresh shrimp cuttings. Pacific Seafood Group maintains strict quality standards based on scientifically-derived FSMA/HACCP systems at all our locations to ensure that the product you receive is the highest quality.

Customers are always welcome to visit our facilities and review our practices. Our definition of excellence, “*consistently doing your best and always striving to do better*”, demonstrates our commitment to providing a traceable, sustainable and wholesome product to our customers and yours.

Product Characteristics

Color/Odor	Pink and mild shrimp
Physical	From whole shell to <2.5 mm
Density	Varies depending on size desired
pH	9.5 – 10.0
Storage	Store in a cool, dry place in original packaging
Stability	36 months when appropriately stored

Packaging Bulk bags (1,000- 1,500 lb)

Certification

This product maintains a Material Registration Certificate from Washington State Department of Agriculture, and is verified to comply with the USDA National Organic Standards (7 CFR Part 205).
Registration #: 2118

Directions for Use

Apply 500- 1,800 lb/ acre/ year, and till into soil. Specific application rates depend on soil fertility and crop requirements.

Processing Statements

Allergen: This product contains crustacean shellfish and is processed in a facility that processes fish.
This product is not intended for human consumption.

Typical Values

The values for major/secondary nutrients, micronutrients, other nutrient properties, and product characteristics are typical and expected.
