

BioGan[®] 6-7-2

Natural Seafood Fertilizer Blend

BioGan[®] 6-7-2 is an all-purpose fertilizer composed mainly of fish bone/fish meal, shrimp and crab shell meals derived from the fresh cuttings of fish and shellfish originally harvested and processed for human consumption. All processing is domestic and shore-based. All facilities are federally inspected. Our fertilizer is registered for use in organic agriculture by the Washington State Department of Agriculture (WSDA) Organic Food Program. It contains no additives for processing or preservation.

BioGan[®] 6-7-2 is a balanced fertilizer and a concentrated source of water insoluble, slow-release nitrogen. In addition, it supplies a significant amount of phosphorus and calcium. Our fertilizer is ideal for establishing fertile soils and growing healthy plants. It releases nutrients slowly and evenly as it decomposes through natural soil microbial activity.

BioGan[®] 6-7-2 is a product of the United States of America. It is traceable with documentation showing source and processing of raw material utilized in manufacturing. Our company benefits from vertical integration within a human seafood company, [Pacific Seafood Group](#), through access to their electronic tracking of catch, landings and processing, and the subsequent disposition of fresh fish and shellfish cuttings. Pacific Seafood Group maintains strict quality standards based on scientifically-derived FSMA/HACCP systems at all our locations to ensure that the product you receive is the highest quality.

Customers are always welcome to visit our facilities and review our practices. Our definition of excellence, “*consistently doing your best and always striving to do better*”, demonstrates our commitment to providing a traceable, sustainable and wholesome product to our customers and yours.

Guaranteed Analysis

Total Nitrogen	6.0 %
5.5 % Water Insoluble Nitrogen*	
0.5 % Water Soluble Nitrogen	
Available Phosphate (P ₂ O ₅)	7.0 %
Soluble Potash (K ₂ O)	2.0 %
Calcium (Ca)	13.5 %

Total Carbon	24.0 %
Salt (NaCl)	1.5 %

Typical

Product Characteristics

Color	Light pink to brown
Odor	Mild shrimp to fish
Physical	Free-flowing, through 100 % < 2.5 mm screen
Density	Approximately 30 lb / ft ³
pH	7.0
Storage	Store in a cool, dry place in original packaging
Stability	36 months when appropriately stored

Ingredients

Fish bone/fish meal, shrimp shell meal, crab shell meal, sulfate of potash

Packaging

Bulk bags (1,500- 2,000 lb)

Directions for Use

Apply 500- 1,800 lb/ acre/ year, and till into soil. Specific application rates depend on soil fertility and crop requirements.

Certification

This product maintains a Material Registration Certificate from Washington State Department of Agriculture, and is verified to comply with the USDA National Organic Standards (7 CFR Part 205).
Registration #: 3153

Processing Statements

Allergen: This product contains fish and crustacean shellfish.

This product is not intended for human consumption.
